

FISCHER IDENTITY AND THE TD SYNnex PARTNER COMMUNITY

Backed by the power and flexibility of AWS, Fischer Identity, a leading provider of cloud-based Identity Governance and Administration (IGA) products, provides organizations of any size with stability, security, and comprehensive redundancy around their IGA ecosystem. Seamlessly manage user identities, streamline governance processes, and fortify your security posture like never before. Fischer Identity's full suite of IGA products, as well as its status as a trusted TD SYNnex vendor, are revolutionizing how organizations protect and manage identities and access.

Fischer Identity works collaboratively with TD SYNnex resellers to perfectly align IGA industry best practices with customer's unique IGA requirements. This strategic partnership ensures the most advantageous IGA foundation for businesses to accelerate their IGA and cybersecurity initiatives.

THE CHALLENGE

AUTOMATING USER LIFECYCLE ACCESS MANAGEMENT WITH IDENTITY GOVERNANCE AND ADMINISTRATION

Today's organizations grapple with the intricate task of maintaining precise control over user access to resources while simultaneously prioritizing a seamless user experience. The absence of secure automation further compounds the challenge, exposing organizations to the lurking risks of security breaches and cyber-attacks.

THE SOLUTION

USER LIFECYCLE ACCESS MANAGEMENT MADE EASY

Fischer Identity, a premier provider of full suite of IGA software and solutions provides customers with a comprehensive, Zero Trust approach to identity management, including automated identity lifecycle management, password governance, single sign-on/authentication, Privileged Access Management (PAM) and compliance solutions, all designed to securely manage identities of all types within any institution, regardless of size and complexity.

FEATURES

- ◆ **IDENTITY AND ACCESS GOVERNANCE**
Automated Onboarding, Request and Approval processes and automated change and disabling of user access. All these processes create a secure user experience.
- ◆ **ACCESS MANAGEMENT**
Users have a simplified Single Sign On, self-service password management along with Privileged Access Management making the user experience easy, secure and productive.
- ◆ **CONTINUOUS COMPLIANCE & RECERTIFICATION**
Deploying continuous compliance keeps your sensitive assets more secure than standard governance, attestation, and re-certification campaigns. This complimentary solution rounds out access governance even further fortifies your security posture.

THE BENEFITS

- ◆ **ACCELERATED TIME TO VALUE**
Fischer Identity's revolutionary IGA suite of products and solutions, designed for ease of management and rapid business impact, provide organizations with a cutting-edge, no-code, configuration-based product to ensure a swift IGA deployment and results. Experience an accelerated return on your investment as the proven Fischer Identity implementation methodology delivers built-to-scale IGA solutions faster than any other vendor, empowering any organization to effortlessly meet evolving business needs and security initiatives, regardless of business process complexities.
- ◆ **PLATFORM FLEXIBILITY**
Fischer Identity offers clients flexible cloud architecture for implementation of the IGA solution. Fischer provides both a multi-tenant Identity as a Service, Private Cloud, or a Sole Tenant cloud on AWS infrastructure distributed by TD SYNnex. A client may opt for Identity as a Service architecture which is managed by Fischer Identity. Additionally, a client may implement as a Sole Tenant or Private cloud which is managed by the client (with support from Fischer as needed) providing flexibility based on the client requirements.
- ◆ **SOLUTION SUSTAINABILITY**
The consistent delivery model provides clients with a supportable and sustainable solution adding to the ROI value of the infrastructure. The subscription pricing model provides predictable costs to stay within budgets while providing significant business value across the enterprise.

CASE STUDY

SOUTHERN ILLINOIS UNIVERSITY - CARBONDALE (SIUC)

- ◆ **THE CHALLENGE**
The existing on-premises Identity and Access Management (IAM) solution was inflexible and unsupported making it time consuming with outdated processes to provide the correct access for faculty and students including an extensive amount of access changes daily.
- ◆ **THE SOLUTION**
SIUC required an established vendor with significant IAM experience with offerings in the AWS cloud that could be implemented rapidly with full postproduction support – The Fischer/AWS solution was selected.
- ◆ **THE RESULTS**
Rapid implementation resulted in an ease of use/simple solution, reducing pressure on internal resources. The solution provided a seamless SSO user experience alleviating barriers to enrollment with a fully supported and maintained product all while adding more security levels across the enterprise.

Our distributor, TD SYNnex, can help you get started with Fischer Identity solutions.
