

Hess Consortium and Fischer Identity

In a powerful alliance, Fischer Identity, a top-tier provider of Identity & Access Management (IAM) solutions, is now a Business Affiliate of the Hess Consortium. Fischer Identity is a long standing IAM vendor for Higher Education and has been assisting institutions with their identity management practices for over 15 years. Seamlessly automating identity lifecycle management, enforcing robust password governance, simplifying single sign-on/authentication, and ensuring continuous compliance, Fischer Identity empowers institutions of all sizes to securely manage diverse identities. Embodying a shared commitment to excellence, Hess Consortium joins forces, expanding the reach and impact of Fischer's cutting-edge IAM solutions specifically built for Higher Education. Together, we shape the future of secure identity management, driving transformative outcomes for institutions with proven business value.

THE CHALLENGE

AUTOMATING USER LIFECYCLE ACCESS MANAGEMENT WITH IDENTITY GOVERNANCE AND ADMINISTRATION

Today's organizations grapple with the intricate task of maintaining precise control over user access to resources while simultaneously prioritizing a seamless user experience. The absence of secure automation further compounds the challenge, exposing organizations to the lurking risks of security breaches and cyber-attacks.

THE SOLUTION

SIMPLIFYING USER LIFECYCLE ACCESS MANAGEMENT

Fischer Identity provides customers with a comprehensive, Zero Trust approach to identity management, including automated identity lifecycle management, password governance, single sign-on/authentication, Privileged Access Management (PAM) and compliance solutions, all designed to securely manage identities of all types within any institution, regardless of size and complexity.

FEATURES

- ◆ **IDENTITY AND ACCESS GOVERNANCE**
Automated Onboarding, Request and Approval processes and automated change and disabling of user access. All these processes create a secure user experience.
- ◆ **ACCESS MANAGEMENT**
Users have a simplified Single Sign On, self-service password management along with Privileged Access Management making the user experience easy, secure and productive.
- ◆ **CONTINUOUS COMPLIANCE & RECERTIFICATION**
Deploying continuous compliance keeps your sensitive assets more secure than standard governance, attestation, and re-certification campaigns. This complimentary solution rounds out access governance even further fortifies your security posture.

THE BENEFITS

- ◆ **ACCELERATED TIME TO VALUE**
Consumers are looking for value and solutions that will solve their business need to help gain a positive experience from their investment. Based on the ability to leverage configuration-based workflows which avoids the need for developing custom code, Fischer can drive implementations faster than any other vendor in the market. This also provides a more stable solution for on-going ease of maintenance. This demonstrates to management a healthy TTV metric of business growth and more efficient operational performance.
- ◆ **PLATFORM FLEXIBILITY**
Fischer Identity offers clients flexible cloud architecture for implementation of the IGA solution. Fischer provides a multi-tenant Identity as a Service, Private Cloud, or a Sole Tenant cloud on AWS infrastructure. A client may opt for Identity as a Service architecture which is managed by Fischer Identity. Additionally, a client may implement as a Sole Tenant or Private cloud which is managed by the client (with support from Fischer as needed) providing flexibility based on the client requirements.
- ◆ **SOLUTION SUSTAINABILITY**
The consistent delivery model provides clients with a supportable and sustainable solution adding to the ROI value of the infrastructure. The subscription pricing model provides predictable costs to stay within budgets while providing significant business value across the enterprise.

CASE STUDY SHENANDOAH UNIVERSITY

- ◆ **THE CHALLENGE**
Shenandoah University faced critical challenges in their Identity and Access Management (IAM) processes, which included a mixture of overnight scripts and custom applications, resulting in slow and inconsistent account provisioning, and concerns about the security of their Identity onboarding process.
- ◆ **THE SOLUTION**
Shenandoah University evaluated various vendors in the IAM space, each offering unique solutions and capabilities. After careful consideration and assessment of their specific needs, Shenandoah University selected Fischer Identity as their IAM partner of choice.
- ◆ **THE RESULT**
Shenandoah University's collaboration with Fischer Identity has proven to be a great success. By centralizing identity management, accelerating account provisioning, and enhancing security, the institution has strengthened its IAM capabilities and positioned itself to thrive.
