Fischer Identity to Showcase Identity Governance Innovation at the EDUCAUSE Annual Conference 2026

NAPLES, FLORIDA – September 15, 2026 – Fischer Identity, a leading provider of identity and access management (IAM) solutions for higher education, today announced its participation in the EDUCAUSE Annual Conference 2026, taking place September 29–October 2, 2026, at the Colorado Convention Center in Denver, Colorado. Attendees are invited to visit Booth #538 to meet with Fischer Identity experts and learn how modern identity governance can help institutions strengthen cybersecurity, streamline operations, and improve the digital experience for students, faculty, and staff.

The EDUCAUSE Annual Conference is the premier gathering for higher education technology professionals, bringing together institutional leaders, IT executives, and solution providers to explore emerging technologies, share best practices, and address the challenges shaping the future of higher education.

For more than two decades, Fischer Identity has partnered with colleges and universities to automate identity lifecycle management, improve governance, and simplify access across increasingly complex campus environments. Today, institutions ranging from large R1 research universities to small liberal arts colleges rely on Fischer Identity to securely manage identities, automate provisioning, strengthen governance, and maintain compliance while supporting IT teams and providing exceptional user experiences for students, faculty, and staff.

"Higher education continues to evolve at an incredible pace, with institutions balancing digital transformation, cybersecurity, regulatory compliance, and the expectations of today's students and faculty," said John Heuring, Vice President of Business Operations at Fischer Identity.

"EDUCAUSE is an outstanding opportunity to engage directly with campus technology leaders, better understand their priorities, and demonstrate how Fischer Identity helps institutions build secure, scalable identity programs that support their strategic goals."

As colleges and universities expand cloud adoption, AI initiatives, and connected campus technologies, identity governance has become a critical component of institutional resilience and operational efficiency.

"Identity is the connective tissue that enables every digital service on campus," said Mark Cox, AVP of Strategic IAM Advisory Services at Fischer Identity. "Whether institutions are implementing AI, modernizing ERP and student systems, or strengthening cybersecurity, success depends on having trusted identities and automated governance at the center. We're excited to discuss practical strategies that help institutions reduce complexity while improving security and the user experience."

Visitors to Booth #538 will have the opportunity to learn how Fischer Identity enables institutions to:

- Automate identity lifecycle management from onboarding through separation.
- Streamline provisioning and access governance across cloud and on-premises applications.
- Strengthen compliance through centralized visibility, policy enforcement, and auditing.
- Integrate seamlessly with leading higher education platforms, including Ellucian, Oracle, Microsoft, Workday, and hundreds of enterprise applications.
- Reduce administrative effort while improving security and operational efficiency.

Higher education leaders attending EDUCAUSE are encouraged to stop by Booth #538 for a personalized demonstration and discussion about how Fischer Identity can help their institution modernize identity governance and prepare for the next generation of campus technology.
